Education

SRM University AP, Amaravati B.Tech in Computer Science, GPA: 8.71	Jun 2023 – May 2027
Fiitjee Junior College, Vijayawada Class XII - MPC, GPA: 9.1	Jun 2021 – Apr 2023

Skills Summary

- **Languages:** Java, C++, SQL, Python, C, JavaScript, TypeScript
- **Web:** HTML5, CSS3, React, Node.js, Express.js, FastAPI
- **Databases:** MySQL, SQLite, MongoDB, PostgreSQL, Supabase
- **Tools:** Git, GitHub, Visual Studio Code, Postman, Docker, Redis

Work Experience

Machine Learning Research Intern — SRM University-AP	Jun 2025 – Aug 2025
• Researched and benchmarked ML models for fake news detection, balancing accuracy vs. cost. • Designed a complete data processing pipeline including text cleaning, tokenization, lemmatization, and TF-IDF vectorization to transform unstructured news data into model-ready features. • Evaluated trade-offs between model performance and computational efficiency.	

Projects

Digital Saathi

- Engineered a MERN-stack application using React, Node.js, and MongoDB, implementing Redux Toolkit for efficient state management and TailwindCSS for responsive UI.
- Integrated OpenAI GPT API for real-time multilingual tutoring and developed dynamic investment simulators using Recharts and Framer Motion.
- Architected secure user workflows using Firebase Authentication and built a centralized Admin Panel to manage lessons, scam alerts, and user data.

TrimLink

- Developed a secure URL shortening API enabling users to create, customize, and manage short links efficiently.
- Implemented JWT-based authentication and Zod validation to ensure safe, reliable, and structured URL submission.
- Built scalable PostgreSQL schemas with Drizzle ORM and optimized redirect handling for fast link resolution.

BondBox

- Built BondBox, a full-stack collaborative study platform using React, TypeScript, FastAPI, Supabase, and WebRTC with real-time video/voice rooms, chat, screen sharing, and whiteboard features.
- Implemented scalable real-time architecture using WebSockets and Redis for presence tracking, matchmaking, and leaderboard optimization.
- Developed gamification features including quiz battles, XP-based leaderboards, friend system, and real-time notifications to increase user engagement.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (Oracle)
Demonstrated expertise in Generative AI concepts, LLMs, prompt engineering, and OCI AI services deployment.
- Google AI Essentials (Google)
Hands-on experience with Generative AI and prompt engineering.
- Oracle Certified Professional, Java SE 17 Developer
Demonstrated proficiency in object-oriented programming, collections, streams, exception handling, concurrency, and modern Java features.
